graphic design portfolio

2024

Originally from Cuba, Ana Tejeda recieved her B.F.A degree in Graphic Design at the University of Houston. She is a multi-disciplinary artist with a music background, and is interested in combining her knowledge and exploring media that includes analog methods, photography, illustration, brand identity, print, and UI/UX design.

air wise
social campaign

2024 | IDENTITY, UI/UX

Airwise is a social awareness campaign empowering Houstonians to embrace and take action towards improving air quality in the city. It also inspires people of all ages to be active, get informed, and become part of social change.
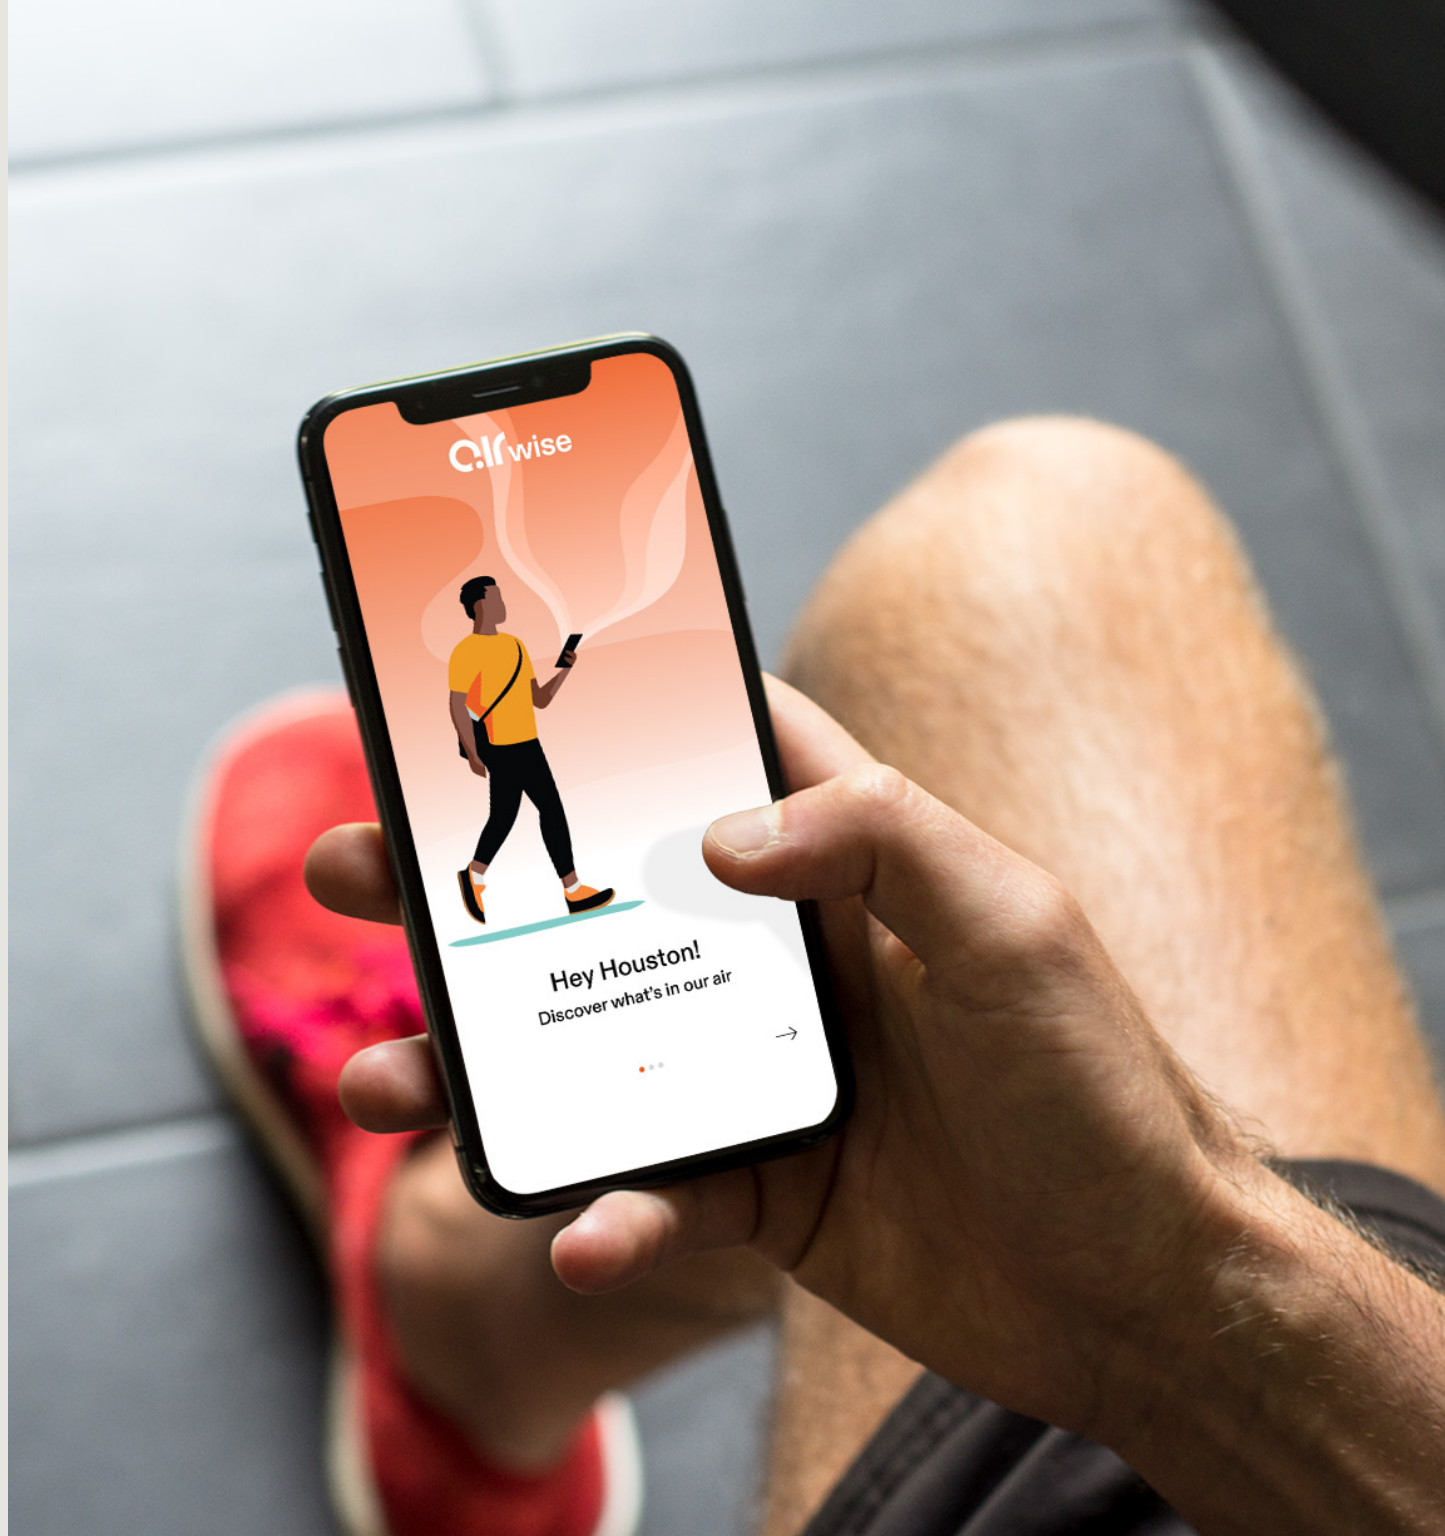

kinetic typecon

2022 | BRAND IDENTITY

An identity system concept created for TypeCon, an annual conference presented by the non-profit Society of Typography Aficionados and dedicated to the promotion and support of typography and related arts.

Teamwork was used to curate a series of interrelated speakers. Hierarchical text and grids create a visual system based on experimental type. The identity includes collateral pieces to explore algorithmic typography.

ibn sina foundation

2022 | BRAND IDENTITY

The IBN SINA branding project focuses on the rebranding for a non-profit organization. The foundation provides integrated, preventive and primary care to low income and indigent families in a clinical setting throughout the Houston area and Port Arthur, Texas.

The deliverables include a target audience report showing statistics and general information, and three brochures for patients, volunteers, and donors.

Who We Are

partners in promoting
Community Health

Our Mission
To ensure the health of the community by providing integrated, preventive, and primary care in a clinical setting through the dissemination and application of health related knowledge.

Our Vision
To provide comprehensive clinical services without discrimination and to treat all patients with kindness and respect.

Our Goals
To improve quality of life, enhance life expectancy, and decrease chances of survival for underprivileged and uninsured patients by focusing on preventive and controllable diseases at an early stage.

Target Audience

- Donors
- Patients
- Volunteers
- Government Affiliates

print workbook

2022 | PRINT & ILLUSTRATION

A book about the techniques and tools of print production. Print Workbook is designed based on the ambivalence of two adjectives: honest and meek. With a minimalist and reserved style it's meant to offset the technical contents of the printing process form start to finish.

Ligatures

Pairs or trios of characters that unify, commonly made from characters that naturally overlap when used together

field guides

2022 | PRINT & ILLUSTRATION

A clean and detailed illustrated series of booklets that delve in the realm of mushrooms. With an overview of their cultural history, a curated watercolor field guide of edible ones, and a modular layout of those that are poisonous and should be handled with care.

As part of the project, this series goes along with a website using HTML and CSS knowledge.

PORCINI
(Boletus edulis)

This fungus grows in deciduous and coniferous forests and tree plantations, forming symbiotic ectomycorrhizal associations with living trees by enveloping the tree's underground roots with sheaths of fungal tissue. Considered the wild mushroom by excellence in the kitchen for its taste and versatility.

They are eaten and enjoyed raw, sautéed with butter, ground into pasta, in soups, and in many other dishes.

CHANTERELLE
(Cantharellus cibarius)

These are among the most popular of wild edible mushrooms. They are orange, yellow or white, meaty and funnel-shaped. On the lower surface, underneath the smooth cap, most species have rounded, forked folds that run almost all the way down the stipe, which tapers down seamlessly from the cap.

The golden chanterelle is perhaps the most sought-after and flavorful chanterelle, and many chefs consider it on the short list of gourmet fungi.

FLY AMANITA
(Amanita muscaria)

Native throughout the temperate and boreal regions of the Northern Hemisphere, has been introduced to many countries in the Southern Hemisphere. Parboiling twice with water draining weakens its toxicity and breaks down the mushroom's psychoactive substances.

After boiling it in a large volume of water, most cultures will either fry them like normal mushrooms, or pickle them, or preserve them in oil.

OYSTER
(Pleurotus ostreatus)

Oyster mushrooms are a popular type of mushroom linked to several health benefits. In addition to being highly nutritious, they may promote heart and immune system health, encourage healthy blood sugar control, and provide antioxidant and anti-inflammatory effects.

The oyster mushroom is a delicacy in Japanese, Korean and Chinese cuisine. It is frequently served on its own, in soups, or in stir-fry recipes with soy sauce.

SHIITAKE
(Lentinula edodes)

Shiitake mushrooms grow in groups on the decaying wood of deciduous trees, particularly shii and other chinquapins, chestnut, oak, maple, beech, sweetgum, poplar, hornbeam, ironwood, and mulberry. Its natural distribution includes warm and moist climates in Southeast Asia.

In Japan, they are served in miso soup, used as the basis for a kind of vegetarian dashi, and as an ingredient in many steamed and simmered dishes.

ENOKI
(Flammulina filiformis)

Basidiocarps are agaricoid and grow in clusters and in the dark, exposure to light results in more normal, short-stiped, coloured fruitbodies. Individual fruitbodies are up to 2" tall, the cap convex at first, becoming flat when expanded, up to 1.75" across. The cap surface is smooth, viscid when damp, ochraceous yellow to yellow-brown.

You can eat it sauteed or raw in salads, or throw it raw into ramen and hot pot and it cooks up right in the broth.

MORNING WITH CREATIVES

Clay Culture: Sustainability in Ceramics

By: Richard Boehnke

Reception: 8:00am
Eden Plant Co. | Houston, TX

When discussing sustainability in ceramics, firing methods and glazes are often mentioned as the key polluting culprits, with gas-fired reduction and heavy metals being the focus of our internal conflict between surface decoration and sustainability.

However, seldom do we speak about the pieces loaded into kilns: "I'm just practicing," "it's a test," and "why not?" are all common reasons given for firing work that does not meet even the maker's standard. Regardless of what we make, any raw clay

book covers

2023 | ILLUSTRATION

A series of booik covers that share a common and very important ele-ment: in each story there is a very young main character who refuses to grow up. The points of view of each author even a bit different all revolve in showing the world they live in through a child's eyes and in an amusing way what's beautiful and cherishable teachings in life.

Sophie's World

One day, fourteen-year-old Sophie Amundsen comes home from school to find in her mailbox two notes, each with a question: "Who are you?" and "Where does the world come from?" From this irresistible beginning, Sophie becomes obsessed with questions that take her far beyond what she knows of her Norwegian village.

Through successive letters, she enrolls in a kind of correspondence course with a mysterious philosopher, while also receiving letters addressed to another girl. Who is Hilde? And why does her mail keep turning up? To unravel this riddle, Sophie must use the philosophy she is learning, but the truth turns out to be far more complicated than she could have imagined.

Peter Pan

A free-spirited and mischievous young boy who can fly and never grows up, Peter Pan spends his never-ending childhood having adventures on the mythical island of Neverland as the leader of the Lost Boys, interacting with fairies, pirates, mermaids, Native Americans, and occasionally ordinary children from the world.

Like many other Disney adaptations, Peter Pan was derived from some dark and tragic origins. The original story was written by J.M. Barrie, who was six years old when he lost his 13-year-old brother, and he couldn't cope with the trauma.

columbia tap
signage

2023 | ENVIRONMENTAL DESIGN

The Columbia Tap trail is a multidi-
mensionl communial space, repre-
sentative of its rich cultural heritage,
green spaces, and community.

In developing the signage system
for the trail, the intention was to
foster community engagement by
incorporating historical facts on the
side of each sign while maintaining
a cohesive identity.

Columbia Tap

GREEN SPACES

"Green spaces" for the lush, natural surroundings along the trail and the environmental importance this public route has on the community.

COMMUNITY DIVERSITY

"Community and culture" for the three super neighborhoods that remain interconnected along the trail, by the trail, each contributing a unique part of this trail's identity.

HISTORY & HERITAGE

**"History and heritage"** for it's deep cultural significance and the reason it exsist today.

| Gateway | Monument Front | Monument Side | Timeline | Neighbourhoods Perpendicular View | Parallel View | Parallel View | Parallel View |
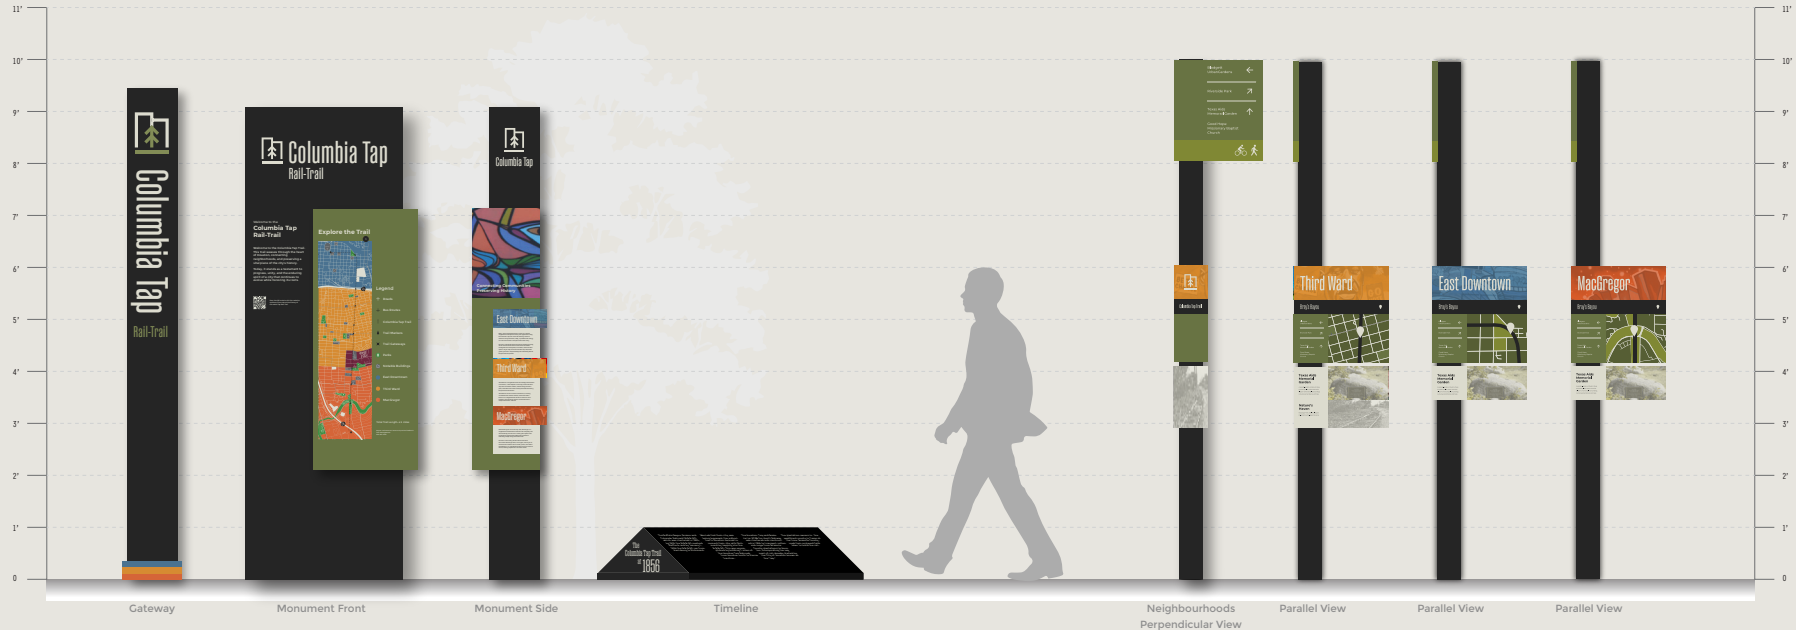

on tap

Play is an installation that celebrates the ongoing transformation of the Columbia Tap Trail and the community that has been at the heart of it throughout. This installation encourages children to interact with the space in enriching, imaginative, and fun ways.

The vibrant, durable building blocks can be easily assembled and rearranged, creating an ever-changing play space.
